01

New File Settings tips:

- **Pixels:** 1000 Pixels + under is small (low resolution), 2000 pixels is a better/bigger size (low resolution)
- **Resolution:** 72 is fine for screens, 300 for print
- **Color:** RGB is for screens, CMYK for print
- **Bits:** 16-bit will be a crisper image (*versus* 8)
- **Name** your file to stay organized

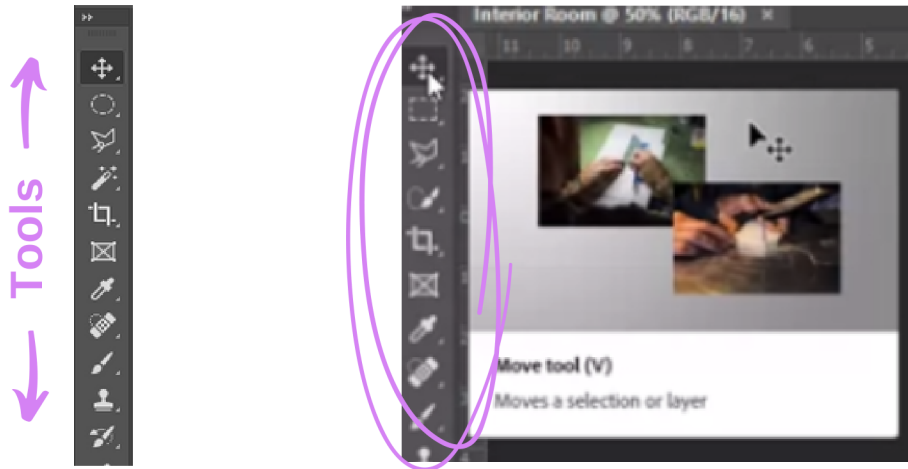

02

Interface overview:

- **In-depth** concentrated overview of platform

03 The Tools Panel (left hand side)

Pro Tip: *Hover on a tool to see a gif on usage*

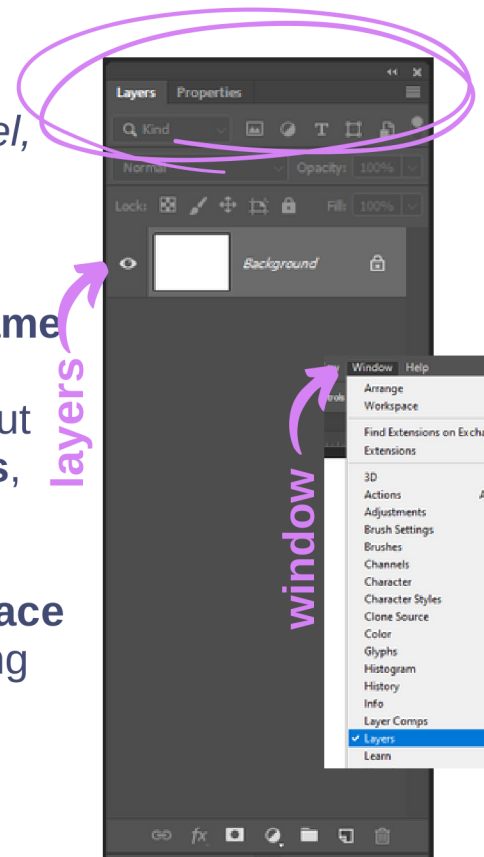

04 The Layers Panel (right hand side)

Pro Tip: *If you don't have a Layers panel, go to Window -> Layers*

Interface Tips

- Double click a layer to change its **name** and **opacity**
- The Layers panel bottom has shortcut buttons for **new groups**, **new layers**, **delete a layer**
- You can change the interface colors under **Edit -> Preferences -> Interface**
- Make sure to set automatic file saving under **Edit -> Preferences -> File handling**

05 The Tools cheat sheet

Pro Tip: *The only tools you need to focus on to get started.*

Move tool (V): *Move the object and layer on canvas*

Rectangular Marquee (M): *Make selection using rectangular shape.*

Polygonal Lasso (L): *Click each point to create selections w/ straight edges.*

Magic Wand (W): *Automatically selects an object or area of your image.*

Crop Tool (C): *Remove part of an image surrounding the selection.*

Frame (K): *Create a placeholder frame for images.*

Eye dropper (I): *Sample colors from anywhere in an image.*

Spot Healing Brush (J): *Remove marks, blemishes, and discolorations.*

Brush Tool (B): *Paint custom brush strokes.*

Clone Tool (S): *Paint with pixels to make a copy from another part of the image*

Text Tool (T): *Add type to your photoshop canvas.*

Line Tool (U): *Add thick / thin / dashed lines photoshop canvas.*

Hand Tool (H): *Pan over canvas quickly.*

Foreground color: *The front / top / active color.*

Background color: *The back / bottom / in-active color.*

JUST A SAMPLE

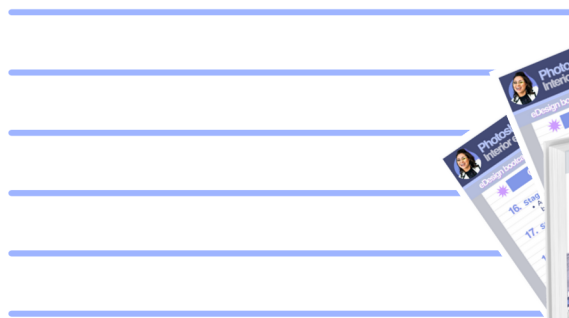

Teaser

Ok I just gave you a small excerpt but free only gets you so far...

Seeing the definitions of the tools is one thing, heck you can do that on Youtube for FREE. BUT it's another thing to CUT down on the information OVERLOAD by getting this course made by an industry expert who can teach you JUST what you need to know to use the program as an eDesigner.

Remember my designer peers: You're not a graphic designer and maybe need some tips from a pro who has mastered this software and can guide you step by step from beginner to advanced through this self paced interactive experience!

staging design

bedroom + office

Notes

BEFORE

01 In this module we build on and accessorize a reference bedroom photo from zillow.com (or a potential real-estate agent / photographer) to learn more about virtual e-staging:

- Learn **tips + advanced techniques** for e-staging that can be applied to your eDesign renders to look more realistic.
- Learn the **difference** of 2D eDesign project **presentation + expectations** from real estate agents for e-staging.
- We will practice more with the **cloning tool**.
- Adding more **wall or flooring** from the reference photo.
- Create a master bedroom with night stands, bench, rug.
- Create an office area w/ desk, chair, + window/drapery.
- **Add overhead lighting** that casts a glow
- Practice fundamentals of perspective + distortion.
